

Q&A Document
24 RFQ 02 AED Devices Request for Quotes

This document may be updated periodically as questions are received.

Q1: Are you looking for the least expensive AED or the one that best fits the purpose?

A1: Department will consider any option provided in your response. We ask that any vendor provide their best recommendation according to the Scope of Work in the RFQ.

Q2: Do the 3 needing replaced have cabinets already? Will the 3 new ones need cabinets? I am assuming they will and would the contract winner be installing the cabinets or would you have on-site maintenance personnel take care of this?

A2: Yes, the 3 units needing replaced already have cabinets. The new units will need cabinets and we do request the installation be completed by the chosen vendor.

Q3: Do you need pediatric capability?

A3: Please provide Department with any options you feel are relevant according to our RFQ. Department will consider all options presented.

Q4: Do you require in-person training, or would you consider Zoom training or free manufacturer service videos?

A4: We prefer in-person training, but a virtual training is also acceptable if that is all that is offered.
